

Doctors, where are YOUR patients getting their health information?

Did you know that 110 million Americans search for Health Information Online every year? Face it, with the Internet playing a huge role in patient choices, yours are inundated with "health" information and tips from Online Health Portals, Search Engines, Blogs, Message Boards, Infomercials...and there's always Aunt Elma's trusty advice.

Do you want to give your patients top quality, award-winning patient education information at any time of the day or night that is developed by doctors?

Provide your patients with top-quality, accurate and easy-to-understand patient education complete with detailed illustrations and videos with 3D animations from iHealthSpot's National Award-Winning Patient Education Library, 24/7, from YOUR practice website!

iHealthSpot's National Award-Winning Patient Education Library includes features that you won't find anywhere else!

- ⊕ Comprehensive written and illustrated patient education content covering 35 medical specialties, PT and Dentistry, presented in terms your patients can understand.
- ⊕ High-quality videos in orthopedics, physical therapy and pain management featuring 3D animations depicting conditions, nonsurgical & surgical treatments for a variety of conditions.
- ⊕ Detailed illustrations with labels of anatomical structures.
- ⊕ News breaking articles are automatically fed to your website!
- ⊕ Four-time national award winner for excellence in health information online.
- ⊕ Completely accurate information overseen by a board certified, fellowship trained physician, and developed by a host of medical and rehabilitation doctors.

Add iHealthSpot's Patient Education Library to your existing practice website for a one-time set-up fee of only \$299, plus \$99/month per specialty! Have it up and running in just two days!
